
Seminar: The Basque Country - Internationalization
and its Global Perspective

Workshop

Basqueness, identity and values

As part of the strategic seminar “Euskal Herria-
Basque Country Internationalization and its Global
Perspective” organized by the Telesforo Monzon
eLab, laboratory of ideas and the Sabino Arana
Foundation, recently we launched a workshop on
“Basque Country – the United States of America, its
Evolution and Future Relationship”.

One of the outcomes of this workshop was the need to strengthen Basqueness, Basque identity and values in the USA to make ourselves more visible and strengthen the political, economic, and cultural bridges among the two nations.

The purpose of this new workshop would be to deepen in these concepts of Basqueness, Basque identity and Basque values in the USA and discuss strategies and practices to promote them.

This new seminar will be co-organized by the **Telesforo Monzon eLab**, laboratory of ideas, the **Sabino Arana Foundation** and the **Cenarrusa Foundation for Basque Culture**.
